## Profile

Self-motivated full stack web developer passionate about approaching challenges from all angles and excited to collaborate with others to create meaningful web applications. Before I began my journey in web development, I worked two jobs while attending college where I learned great time management and leadership skills which has already helped me with my work. Excited to put my excellent work ethic to use in a fast-paced, quality-driven team.

## Projects

### Simple Eats

<https://github.com/kaciehatley/simple-eats> | <https://kaciehatley.github.io/simple-eats/index2.html>

- Collaborative client-side project using HTML, CSS, and JavaScript to create a recipe search application.
- My main role in this project was to work on the JavaScript for the filter search options but over the course of the project, I worked on adding Modal's, setting up functions for the grocery list, and some styling with CSS.

### Developer Profile

<https://github.com/taylorbruno/newDevProfile>

- This is a command-line application that dynamically generates a PDF profile from a GitHub username. This project was built dynamically through JavaScript, Node.js with an HTML/CSS template.
- I created this independently through an assignment with the UNCC Bootcamp that did provide a starter template for the HTML/CSS.

### Weather Dashboard

<https://github.com/taylorbruno/WeatherDashboard> | <https://taylorbruno.github.io/WeatherDashboard>

- This weather dashboard allows the user to search for a city and displays the current weather conditions and a 5 day forecast. This project stores the last 5 searched cities in local storage and will have that history displayed.
- I created this independently through an assignment with the UNCC Bootcamp that did provide a starter template for the HTML/CSS.

## Experience

### General Manager, MOD Pizza | Mooresville, NC | Aug 2018 - Aug 2019

- Daily use of team leadership and team building skills to meet deadlines and metrics
- Required to develop and train team and leadership members.
- Team work and working across a variety of personal capabilities.
- Customer service management.

### General Manager, Papa Murphys | Mooresville, NC | Oct 2011 - Feb 2018

- This job had the same roles/duties as the above position, but I did begin this job as a crew level and worked my way to General Manager within two years.

## Education      University of North Carolina - Charlotte | Full Stack Coding Bootcamp, April 2020

## Skills

HTML, CSS, JavaScript, jQuery, Node.js, Responsive Design, Version Control/Git, Browser Developer Tools, Command Line Interface, Oral/Written Communication, Problem Solving, Organized, Team building/management, data-driven.
